NBS Printer Requirements

KPMG Consulting

- Users will select a default printer for host-directed printing, but may select any other printer defined in NBS
  - Host-directed printing required for official, fully formatted reports

- Local printing to a desktop defined printer can be accomplished using browser printing capabilities in a multi-step process

- Starting Point – Enable NBS printing by defining current ADB Printers for October 2002

- Add Additional Printers as Required per Deployment

ACTION ITEM:

Provide requested information to Moses Perrone [perronem@mail.nih.gov] by 8/15 for validation and conversion into NBS system. Please see matrix on page 4 and ensure that your IC has provided all the required information.

The following information is required to define printers in the NBS applications and at the OS level:

- Institute (e.g., CC, NIHGRI)
- Printer Name / ID (e.g. NIHC2924)
- IP Address (e.g., 137.187.152.18)
- Printer Type (e.g., HP LaserJet5, HP LJ 4000N)
- Location / Description (e.g., Bldg 49 Rm 3A NIHGRI)

- NBS Printer Name is created from Institute shortname concatenated with a sequence number.
- NBS Printer Description is created from Location / Description.
